Portfolio

Education

Bachelor Of Applied Computing Technology, Dec'22
COLORADO STATE UNIVERSITY
Fort Collins, CO

Key Skills

Skills:

Java | C | C++ | Python | LC-3

SQL | HTML/CSS | JavaScript

JSON | PHP | React | GitHub

Microsoft Office

Operating Systems:

Linux | Microsoft Windows

MacOS | Unix | Raspbian

Profile

Bachelor's degree in Applied Computer Technology and former United States ski team representative at Junior Worlds 2017. Intensive training and knowledge with many high and low level programming languages and techniques to achieve client/project specifications. Seeking a software development position where I can leverage not only my collegiate education, but also my leadership and competitive experiences working collaboratively within a team environment.

Project Experience

React.js: Created a social media web application that utilized React.js and firebase databases to implement a responsive user interface that allows users to post images, text and to like other users posts.

Java: Collaborated with a team of 5 for 4 months to make scalable APIs for a map routing system. We chose to use Java on the backend to handle large amounts of data, for the frontend we used React.js to create a user friendly interface allowing for the user to input destinations and locate the quickest route. Overall, our project exceeded our expectations.

C++: Implemented a TV scheduling system that allows for the user to input new shows into an existing system and create the most optimized schedule possible. When creating my own skiing video game in Unity, I chose to utilize C++ for its ability to handle players actions and functions due to its fast processing power.

SQL: Designed and implemented small and large scale databases while using python queries to interact with the new databases.

Professional Experience

COMPETITIVE SKI TEAM COACH
WINTER PARK RESORT – Winter Park, CO   **2019- Present**

- Evaluate and provide feedback to teenage ski racers to improve their skiing techniques and skills
- Collaborate with fellow coaching staff in important decisions
